Description of the Prior Art A common problem encountered by children is keeping track of their shoes. When they travel by air, for example, they typically have no control over the placement of their shoes in an overhead locker. When they arrive at their destination, however, they are typically tired and disorganized. As a result, shoes are often strewn about the passenger's seat, under the seat or on the floor, etc. These arrangements are undesirable from an aesthetic viewpoint as well. To solve this problem, a number 2d92ce491b
