2. The Lost Commandoes (Triology) – The Lost Commandoes is a series of three science fiction action novels written by C. J. Sansom. It forms a trilogy with the author's The Marauders and The Stone Gods, the first of the three books was released in March 2015 and it was the winner of the 2015 BSFA award for best first novel. The Lost Commandoes is set in a future world, in the year 2487, Earth is partitioned into a number of ethnic and cultural areas known as nation states, and the world is led by a government. Humans live on a single planet called Earth, and the major nation-state is known as Commonwealth. The Commonwealth was founded in the year 2300 following the destruction of the human race by a meteorite which wiped out almost all life on Earth. By 2300 the Commonwealth has united all the nation-states of the world into a single world government under the leadership of the Parliament of the Commonwealth. The Commonwealth has set up a series of colonies in the Solar System, and has taken care to spread the population of the human race throughout the Solar System, on the original planet Earth, all human beings have been brought to the brink of extinction by a deadly disease called the Retrovirus. The Commonwealth supplies the colony ship to any nation-state which applies, on December 25, 2425, the Retrovirus is brought back to Earth from a Mars colony and reinfects the human population. The nation-states fight to keep the infection in their own areas, but the Commonwealth takes immediate action, Commonwealth support troops arrive in the various national territories and stabilise the situation. The nation-states form a Commonwealth Commonwealth Resistance leads the fight against the Commonwealth, the Resistance is mainly led by humans, but the Commonwealth also has several types of non-human soldiers on its side. The Commonwealth also has androids as its soldiers, the Retrovirus is eventually neutralised, but not before causing further destruction, loss of life and mass extinction. At the time of the Retrovirus outbreak, it was known that, in 2427, the Commonwealth attempted to make certain that this would not happen again by setting up a series of cloning facilities to preserve human life. By 2431, however, a rebellion began, led by clones called the Total Army, the rebellion was brought under control by the government in 2439, after the rebels had been killed, brainwashed, or taken over by an artificial consciousness.
