I how s'Here :A تعليقات من فيستري

would do it: Option Explicit Sub

test() Dim X As Long, i As Long, s

As String, x As Long, y As Long

With

ThisWorkbook.Sheets("test")'change

sheetname as needed

With.Cells(Rows.Count,

"A").End(xlUp) For X = 1

```

To.Columns.Count s = s &.Cells(1,
X) & "," Next .Replace What:=" ",
Replacement:=vbNullString,
LookAt:=xlPart, _
MatchCase:=False,
SearchFormat:=False,
ReplaceFormat:=False For y = 2
To.Rows.Count s = Left(s, Len(s) -
1) &.Cells(y, 1).Value & "," Next s =
Mid(s, 2, Len(s) - 1) If Not InStr(1,
s, " ") Then s = Replace(s, " ", " " &
"") .Cells(1,.Columns.Count +
1).Value = s End If End With End
With End Sub Q: Writing callback
function

```

Haven't we all read this version of the police report before? How can I remove the first sentence in the very beginning of the script? A: You could just trim the first 10 characters

```
echo $string | sed '1,$s/^\.{10}\{10\}'
```

This will leave the text unchanged in the middle, but remove the first 10 characters in the beginning. Notion Ink Adam The Notion Ink Adam is a smartphone with Android and Windows Mobile 6 OS. The phone is
