The CSP is basically about: block script sources on the page, block CORS access to remote resources, block XSS attacks, block clickjacking attacks, ... For the case when attackers are using new JavaScript techniques to bypass the 1st and 2nd block, I implemented the following JavaScript / HTML: var _kci_js_blocked = "

Bubble Chatter is the best and most reliable Facebook chat software. It is so easy to use, that you'll be able to switch immediately. It helps you keep track of your Facebook chats and even reads them out loud in real time. Social networks with the MIX and MIX-D applications are becoming more common and more useful. Many organizations are now using these networks to get feedback from people that are members of their community. MIX is a social network similar to MySpace, Facebook and other well-known social networks, but it uses Google's Google Talk application to communicate and upload photos and videos. The simplicity and ease of use of the application leads to a greater number of users, both in the number of people who use it and in the number of users in each country. The application allows you to publish your photos and videos and it is one of the most diverse networks at present. It is very easy to navigate and has a powerful social network algorithm to allow your friends to find you. Quick and secure messaging You can send text messages between friends, this includes photo's and videos. Large community MIX is a social network with a growing user base and a community of almost nine million users. Send photos to your contacts The application enables you to send photos directly to your friends. Public and private messaging Private messaging allows you to communicate with only your contacts, the service also includes a hidden chat feature that is fully integrated with MIX. MIX Lite is a Facebook application that allows you to become acquainted with the popular social network, while retaining the look and feel of your desktop or mobile browser. This means that you can install the application in your browser, from a link to MIX or from the friend's profile, following the data and privacy settings you choose. The MIX Lite application can be used to communicate with other MIX users, to browse their profile and to upload photos. It also allows you to easily invite your friends on the social network and to follow them. You must install this app before submitting a review.
