Q: Custom Posts in Category as list I would like to show custom posts from a category and also a category description, and linked to a custom post I have made (Image/Video). I know it's a lot of code, but I do not know where to go with this. Is it possible to have this function? I know how to make a list of all the posts in a category: What I don't know how to do, is how to add the custom post code, and what to add as category. I can do what I want in the theme files, but I think that's a lot of code and in the template files I should add code (I know nothing)
A: Supposing that your custom post has field (presumably called id) called cp_id and you have the category called cpcat, then this should do the trick for you: If you need to add a title to your post then you can change cat='.cpcat.' to cat='\$title' like so: Get all the latest news on coronavirus and more delivered daily to your inbox. Sign up here. Europeans say they are most concerned about the spread of the coronavirus in China, according to a new survey. A YouGov poll of 10,000 Europeans, commissioned by British health authorities, revealed that 22 percent of Europeans believe more needs to be done in terms of coronavirus protection, with the UK coming top in the survey of 27 European countries. In a statement, Public Health England said that British people were among those who were most concerned about the coronavirus. "This widespread feeling and awareness is a key reason why we are so confident that the UK is prepared to respond to the health risks posed by the outbreak, and that we have the skills and capability to deal with any anticipated impact on the NHS," said Dr
