Anti-Twin Portable Serial Number Full Torrent

Wow! this is a very nice program! I tried it on my win 7 pro x64 system and it was super fast! I took a 6,000 picture folder from one of my storage drives and it returned with less than 20% of the photos. I have used it on other computers and it was super fast as well. I used another program I found on the web to delete duplicate photos, but Wow! this one was way better! I would highly recommend it to anyone. Keep up the good work! Q: Spring multiple provider I have a question for those who know Spring. I created a bean : And in my bean: `public static List get() { List list = (List) getProvider().getAll(); return list; }` and in my Controller : `@RequestMapping(value="/add", method=RequestMethod.POST) public String add(@ModelAttribute("provider") Provider provider) { return "add"; }` My Question : How can I get all the provider bean that I have in my provider bean? I can do it by : `@Autowired private List providers;` but I want to do it by Provider bean with a method who can return my provider beans (because I don't want to write this in my controller : `@Autowired private List providers;` And I do : `@Autowired public List getProviders() { return providers; }`
