And many couples take advantage of that decision and ask to do the wedding of their dreams. But what about the rest of us? And if you're in the market for a new home, then you're probably looking for a location that's very close to you. One of your priorities is having easy access to your new home. As you're planning your dream wedding, you'll need to make sure that it's also in an area that you'll have easy access to your new home.Rapsosuva Rapsosuva (also spelled Rapsozouva) was a town of ancient Cilicia, inhabited in Byzantine times. The Autodesk® 2019 Fall Summit brought a mix of passionate and engaged voices from across the community talking about how we've been working to bring Autodesk software to the broader world of architects, engineers, and creators. Here are some of the themes that we discussed and that we're looking to further develop as we build 2019. Today's blog post is a summary of what we talked about. If you are interested in more detail, you can read the full transcript of each session. Design and collaborate more easily with AutoCAD and 3D CAD Drew Revercomb, director of technology at AutoCAD, talked about the importance of collaborating in CAD. He said that the 3D CAD environment is a more collaborative environment than the 2D environment. And to help designers work together, AutoCAD makes the social collaborative tools a natural extension of drawing. A natural collaboration space allows users to work together and get updates about what's going on in the drawing in real time. So if someone shares an annotation, they get an update in real time. And if someone else is working on the drawing, they'll get an alert to come to the drawing. An example of this was shown with an interaction between two people in an architectural drawing. The first person was drawing the ceiling and the second person could see the ceiling and respond, offering a suggestion on the line or perspective. When looking at an architectural design, it's easy to overlook some of the context that the design exists in.
