Being a full time journalist, my cover is professional, so I like to think I'm selling myself well. But from an account management perspective, I don't want to let the world know I write for a living (or even "work") because it makes me much more accessible and friendlier. With my cover as a non-fiction writer, the balance is not so one-sided. I have a writing book, and I write about some important topics in accounting, but I'm not a full-

time non-fiction writer. I'm also not writing business books about startups and customer service. So my book is going to be different. The author of this book and I actually have a pretty similar outlook on life. We both try to be thoughtful, kind, good people who share experiences and are funny at times. For me, that means I write about management, accounting and business. For him, it means he writes about pop culture, politics and other topics that he's passionate about. We're going to build this platform and brand together. The idea is to connect with each other and be funny. I like the idea of just being a fun account manager. If you're reading this, 5b5f913d15

Well, I'm not quite sure what to write about today, but I'll try. I was thinking about an idea I had on the site - a system where there is a reward for each "guild". There are 5 guilds for now. You can think of them as a ladder of dungeons for each race: 1. 'Collectors' (Cards and Pasture) - easily thought of as a content for collectors who are looking for some content to play with others. No real content, but enjoyable. 2. 'Hybrids' (Blacksmith, Shipyard) - a content where the players are building a ship and you have to wait for completion, or fail in some way and lose out on some gold. Obviously the requirement to succeed is too high, which would probably result in players staying away. 3. 'Machinists' (Foundry, Blast Furnace) - a content where you are creating a weapon and trying to see how strong it is. 4. 'Explorers' (Dojo, Wilderness) - a content where you are exploring the desert - find treasure chests, rocks, herbs, whatever and get some gold from it. 5. 'Lunatics' (Hall of Assembly, Mill) - a content where you are making different sort of supplies (bread, hammers, etc), and trying to make a lot of them to get a high score. You can think of the rewards as scales for each guild. So for example, in Collectors, you are earning 1 point for every card you take, 1 point for every pastur, 1 point for each rock you collect, 1 point for each herb. A lot of times, when you go to the next level, you will earn more points for the same thing. This will depend on the level. For example, for Collectors, Level 1 was 1 point for every herb you took, so if you didn't collect any herbs in your level

Audio/Video: Bring your presentations to life with high quality sound and rich, realistic graphics and animation. (video: 1:55 min.) XML Services: Incorporate the XML Metadata Exchange (MXDE) system into AutoCAD, giving you a new way to share drawings in the open with external systems. (video: 1:44 min.) PDF Services: Adopt the PDF/A standard to support the highest level of document integrity. SVG and HTML: Bring dynamic digital publication to CAD. Create interactive diagrams, infographics and interactive maps with the rich content and interactive features of SVG. Pen Tools: Support pen-based input with a wide range of new drawing tools, including line and text tool enhancements. Add any sort of writing and a variety of grips to paths and text. Real-Time Collaboration: See your colleagues' changes to your drawings in real time. Preview the drawing in an editing application and make changes in real time. (video: 1:53 min.) Machine Learning: Use AutoCAD to develop CAD-specific machine learning models for automotive, construction, mechanical, and other industries. More: Add dynamic layers to drawings and layers from other applications, set transparency, create layers from geospatial data, use layers to color-code parts, add cut list support, and much more. (video: 3:31 min.) Podcast: Receive AutoCAD updates as a podcast to listen on the go. (audio: 59.7 MB) Curious about what's new in AutoCAD 2023? Download the release notes today.
