[2022-Latest]**

The Canon PIXMA MP240 printer works as advertised. It is a very easy to use all in one inkjet printer. I am so happy with this printer I ordered a second one. It prints amazing pages with vibrant colors. It does require a fairly large supply of ink. I had to wait a couple of weeks for the ink to arrive but this doesn't

bother me. I like the fonts and the paper for photos is amazing. This is a great printer to add to a small office. I highly recommend it. [Read more >](#) Maybe i found the perfect all in one printer for me. Except the manual was for version 10.1 and im using the 10.3 version. Seems like the 10.3 has all the new features. So i have to work on the software. But when i first bought it, it was super easy to use. I just plugged it in, installed the software and it worked right away. I have not been able to use my old 10.1 software due to a water damage on my desk. I did fix that by wiping it down but it is still not the same as the other software. So i am using the new version until i can get the older version fixed up. I am looking forward to a better experience with my printer. Its a very nice all-in-one printer and scanner. Canon seems to have gone after the low price and efficient market with this one. Its easy to

use and print really high quality output. I have had this printer for over a year and have not had any issues with it. Canon customer service is also excellent. I plan on purchasing a second one soon. This is a great printer for the home.

It has everything that I need in one printer. Great picture quality, very easy to use, and for those of us that have small offices, we can fit it right into our desks. I am a fan of Canon products and I always buy my printers from them. They are great quality and very easy to use. If you want a good printer and are not looking for more than print, scan, and copy, this is the best printer for the money. I have used a lot of printers over the years and I am always drawn to the Canon brand. This printer is great for the price. It does have some issues with ink but I think most printers do. I have been using this printer for a year now and its worked fine the entire time. I have not noticed

any issues
