iStonsoft USB Data Recovery is a simple to use freeware that allows you to recover all deleted and corrupted files from USB storage devices. From floppies to memory cards and hard disk, USB storage devices are used to transfer files to and from computers in an easy way. However, when files are deleted from these USB devices, users lose them forever. Or, if you are too careless with these devices and accidentally remove them, it means that you can no longer access them. In most cases, when you try to recover lost or damaged files, you will find that it is very difficult to access them because they have been destroyed. Many data recovery software on the market perform well and they recover the data before it becomes irrevocably lost, but they are too complicated and pricey. They can scan your USB storage device and find the deleted files, but it might take a very long time depending on the number of files.
