Fierabras. He is a man who embodies the power of this club. He seems unstoppable as he battles Arupa in the subterranean vaults of this bar. This is a vampiric horror film.Q: Oracle: Oracle procedure runs on one server but not the other, why? I'm writing an Oracle stored procedure that takes 3 parameters (ID, IP address, and Date) and does a lookup using INET_ATON: SELECT * FROM DB1.vtable WHERE IpAddress = INET_ATON(:IpAddress) AND Date = :Date It runs fine in my local environment, but on the Oracle database server, it fails due to: ORA-06502: PL/SQL: numeric or value error: character to number conversion error If I remove the Date constraint, the select returns about 1,000,000 records and my application creates about 1,500,000 XML files each time I run it. That explains why I'm running into this error. If I run the select statement at the command line, there's no error, and it returns about 500 records. When I look at the wait events in DBA_WAIT_TABLE, I get: PROCEDURE_NAME ACTIVE WAIT_TYPE
