What can Nitro PDF V6.2.3.6 do? When you open or print a PDF document, you might have to wait a few seconds while all the pages are being scanned. In that time, Nitro PDF goes to work. First, it analyzes the PDF and pre-scans the pages. Then, it assembles the pages into a virtual document image, so it can be scanned more quickly, and can store the image information for future pages. In addition, and once again in parallel, Nitro PDF analyzes any embedded objects such as images, text, and shapes, and saves the information in the document. Finally, Nitro PDF renders the final document. The more you use Nitro PDF, the more your computer benefits. First, you'll be using it less, since it will be scanning your documents for you when you print or open them. Second, Nitro PDF can use any software on your computer to process, pre-scan, and render documents.
