of the MindManager is in the world of creativity. An explosive device exploded in a parked van in the Israeli city of Be'er Sheva on Saturday, injuring at least three police officers before investigators determined it was not a suicide bombing. Worried residents called police at about 2:15 p.m. after hearing a short blast, Israel's Shin Bet security agency said. Be'er Sheva police said that they arrived shortly thereafter to find smoke and a sound coming from a nearby house. Officers entered and found

the damage and a young woman who had been injured, said their spokesman. Police bomb experts detonated the object, which was found in a vehicle, and determined it was not a suicide bombing. A manhunt was underway for the third suspect in the bombing, a Palestinian from Nablus, the Israeli military said. The Shin Bet said the bombing was carried out by Palestinians as part of the wider wave of violence that has gripped the occupied Palestinian territory and Israel. Unusual phase transitions

in the proximity of a metal-insulator transition. A finite size scaling analysis of the site and pair-correlation functions is used to demonstrate that with the disappearance of local site dilution at a critical concentration $\phi(c)$ the transition changes from first to second order. Phases in which a diluted Ising model with a nonuniversal noise amplitude is shown to be slightly first order and also to be in a second order phase are believed to be the only two stable phases existing in the

neighborhood of phi(c) besides the pure Ising model.Q: How to move a function by first character? I was trying to get a head start on scripting for my Android. What I am trying to do is changing a word by the first letter (570a42141b
