CatchColor is a simple yet powerful color utility. It's designed to be used in conjunction with your website so that you can save and reuse colors in any other parts of the project. The program is intuitive and easy to use. Just open it and point your mouse to the color you want. Then a menu appears. From there you can choose the mode: HEX or RGB. If you choose HEX mode, you'll be able to preview the hex value of the color you want. If you choose RGB mode, the program will return you a hex code, however, it will show you the exact color that you are looking for. The program has several other options that make it easy for you to use. You can choose the whole screen or just a part. You can limit the scope of the color by choosing RGB or Hex code. You can also export the colors to an Excel file. CatchColor Uses: The only drawback with this software is that it is only compatible with Windows. Trickster is a very simple tool that is designed to let you quickly download all the images from a website. It is very easy to use and allows you to choose the web page that you want to download. Once you've specified the URL, the tool will do the rest. You can select the images you want and click the Download button. This is a really cool tool because there is no limit to how many images can be downloaded and you don't have to navigate through the website to download them. All you have to do is copy the URL of the page and run Trickster. You can use Trickster to download all the images in a website to your computer or to the Cloud. The images are downloaded directly to your computer without displaying them in the browser window. This can be a great tool if you need to download all images from a website or blog. The tool is free to use and the developer offers a 30 day free trial so you can try it out before you buy. Trickster is very easy to use. Trickster Description: Trickster is a web-browser extension designed to download multiple images from a web-page. You can use it to download images from blogs, news sites, forums, etc. without having to visit them. It works with all major web browsers, but the images are displayed within the browser window. If you download them using Trickster, you can access them later from the computer. The images can be

- Let you generate up to 8 images with all the properties, formatting and editing you can make - You can edit and apply effects directly to these images - You can use these images as captions, backgrounds, signatures,... - When you launch the app, it will automatically select the last image opened, and then you will have a huge amount of formats from which to choose. - You can also create any number of images by simply editing one - You can also easily create a slideshow from the images you create - You can add any text you want on each image (if you do not add a textbox, you can put a text over the image) - You can apply many editing effects to the images, including: - Warp - Transform - Grayscale - Adjusting brightness - Transformations - Adjusting hue - Create a smart object -... - You can also save the images in PNG, GIF or JPG formats - When you save, the app automatically adds a unique name for each image - You can save it in the same directory as your original file, or in a different directory - You can create folders or zip files - You can rename, move or copy your images - You can also add a special effect for each image - You can also upload the images to your computer - The background of the app is animated. You can use it as a wallpaper - You can also change the desktop background to a specific image - You can add a new background for each day of the week - You can also change the theme of the app at any time - The app also allows you to edit the program using the MacroTool - CatchColor is a small lightweight app, you do not need to install anything in your computer - Easy to use - Create a slideshow - Create a poster - Create your own signature - You can edit and apply effects directly on your images - You can also select and re-use colors from a website - You can also use a website to select colors - You can also use an image or a photo from your computer to select colors - You can easily use the image you selected as a background - CatchColor is available for Windows, Mac and Linux - You can also install the app in your virtual machine - If you use a Mac, you can also use the app in your virtual machine - If you use a Windows, 1d6a3396d6
