TECHNOLOGIES & GAMEPLAY FEATURES

FIFA 22 is built upon the ground up, dedicated Team Studios Team delivering on a unified vision. In FIFA 22 there's a unified approach to all aspects of making the game.

New Ground Up Approach to the Game

New AI Intelligence

A smarter AI. We wanted to create an AI that makes intelligent decisions based on the situation at hand.

New Player Intelligence

The changes to Player Intelligence ensure that players who play differently from each other will react in a more realistic manner.

New Designated Player Intelligence

This is a major update for the Designated Players. We also wanted to reinforce the importance of Designated Players, by adding more customisability to create the ultimate player.

New Dynamic Player

Starting in FIFA 19, players can design their player, but could not really determine who they wanted to play in certain positions. A Dynamic Player will now make use of the player's own unique traits, and show them off in the on-pitch action.

Fan the Flame Exclusive Player Content

will be more immersive and fan-oriented.

Better Tactical AI

Tactical AI will allow players to react better in real-time. Players will react to how you play and how you set up for certain situations.

Improved Passing & Crossing

Crossing and passing will

be more accurate and will cover an angle that will cover the goal. Your Ultimate Team Defining your Ultimate Team is easier than ever in FIFA 22.
