COM-port based weighing application: The program allows you to weigh any object placed on the weighing truck or passenger car indicator. You can import the data from any type of database for Microsoft Access, SQL Server 2005 Express or Oracle. Data can be saved to the database, exported to Excel, or by error, saved to the clipboard. Weighbridge Software can register the gross weight on any object placed on the weighing truck indicator. A truck indicator can weigh various objects and weighs the received material accordingly. For example, a heavy truck can weigh a 40-ton load of freight,

Weighbridge Software Free For PC [Latest 2022]

Weighbridge Software Torrent Download is a reliable weighing application suitable for the business environment, ready to help resource administrators in accurately determining the weight of input materials and outgoing final products. COM-port based weighing application The application supports multiple COM port entries, establishing connections and communicating with any weighbridge indicator. The captured data can be stored in various database types, such as Access, SQL Server 2005 Express or Oracle. Weighbridge Software can record the gross weight on any object placed on the indicator. In order to determine the net weight, it takes into consideration the tare weight of the vehicle or box that carries the load. Manage customers and suppliers The application can keep track

of all the customers and suppliers, storing their contact details (address, phone numbers, website). Moreover, it can record information concerning vehicles, the corresponding tare weights and the names of the drivers, as well as product prices, type, measurement units and quantities, making it easier for you to select the desired information when completing a form. Its main window comprises accessible options, enabling you to specify the name of the customer and the vehicle, the name of the item, the payment mode and other similar details. For each weighing operation, a new ticket is created. Generate reports The integrated report generator can help you create various analysis reports regarding the input items, customers and suppliers, users, vehicles, which can be easily forwarded to managers and authorities. Furthermore, data can be easily exported to Excel. Password protection guarantees data security and the impossibility to alter the defined configuration settings without authorization. The application supports multiple users and enables the administrator to customize the login passwords for each. Weighbridge Software Description: Weighbridge Software is a reliable weighing application suitable for the business environment, ready to help resource administrators in accurately determining the weight of input materials and outgoing final products. COM-port based weighing application The application supports multiple COM port entries, establishing connections and communicating with any weighbridge indicator. The captured data can be stored in various database types, such as Access, SQL Server 2005 Express or Oracle. Weighbridge Software can record the gross weight on any object placed on the indicator. In order to determine the net weight, it takes into consideration the tare weight of the vehicle or box that carries the load. Manage customers and suppliers The application can keep track of all the customers and suppliers b7e8fdf5c8

Weighbridge Software Crack + Activation Code With Keygen

You are running the weighing application that helps you to manage customers and suppliers, as well as to create numerous reports regarding their sales. Its main window contains the following options: - Customers and suppliers: here you can maintain a record of all the customers and suppliers, their contact details, as well as their vehicles, the corresponding tare weights and the drivers' names. - Item: here you can enter the name of the product and its quantity. In case of the number of products is large, the items can be displayed in different columns. - Operation: you can record the transaction date, the number of items, total weight, transaction details, the type of payment (cash or credit card), and additional comments. - Group: here you can select the group to which the information of the transaction will be sent. You can select the type of group — reweighing, with or without the driver, either a card/cash operation (with optional data entry for the amount and date), or sale/return. - Analysis: you can generate reports in PDF format. The application contains a built-in report generator that helps you to create various analysis reports regarding the input items, customers and suppliers, users, vehicles, which can be easily forwarded to managers and authorities. - Specify recipient: the application will make sure that you can specify the name and address of the recipient in case of the export to Excel. Each new ticket is automatically and uniquely generated. Therefore, you do not need to search in the database for any similar data. Weighbridge Software has been built in order to help you process your daily business tasks with ease and convenience. The following demo program was created for the purpose of demonstrating some of the features and functionality of Weight Station. It is not a complete commercial program. The demo program implements a user interface with a list box (LST_USR), a push button and a text field (TC_USER_DESC). If the user clicks the push button then the program does the following: 1.The list box is cleared by the program. 2.The program displays the description of the user in the text field (TC_USER_DESC). 3.The list box is cleared and a description of the program is displayed in the list box (LST_DESC). 4.The program closes. Description: Stored procedures are programs that return recordsets. The intention of stored procedures is to avoid writing
